- Typescript | Javascript
- Python
- React
- Express
- Dart | Flutter
- GraphQL
- Databases
  - MongoDB
  - PostgreSQL
  - Firestore
- Docker
- Kubernetes
- Microservices architecture
- Prototyping | Figma | Adobe XD
- Vector graphics | Adobe Illustrator
- Photographic edition | Adobe Photoshop

## WORK EXPERIENCE

### Team lead developer | INECO - Mental health

February 2022 - Present

I'm in charge of passing the clients needs and desires to our devs team.

I also design our high reliable and scalable micro-services architecture and flow of our products.

Working and solving our most challenging tasks while also organizing and leading the team.

### Fullstack developer | INECO - Mental health

March 2021 - February 2022

In charge of multiple services and with a 10.000+ users load.

I've worked with express.js, mongoDB and Firebase in the backend, and ReactJS in the frontend.

We also have developed a mobile app with dart using flutter that is currently online with 500+ active users.

Everything built with a micro-services architecture with Kubernetes, always with high reliability, scalability and 100% up time in mind.

### Co-founder | buildware

June 2021 - Present

Working as a side-project where we make IoT devices and help companies have more control and insights about their products and infrastructure. Our products are currently used by the University of Cordoba among other clients.

I'm in charge of the product design and also work with the development team as a software engineer.

### Freelance

2018 - Present

Fullstack development works working with CMS (Wordpress), HTML, CSS and JS in the Front-end. And with NodeJS, Express, Sequelize and MongoDB in the Back-end.

-Developing the UI/UX design.

-Coding front-end.

-Coding API server for back-end.

-Designing data contracts and flows.

## STUDIES AND TRAINING

### Universidad Tecnológica Nacional

Professional Front End Developer | August 2020 - February de 2021

Responsive web development, using Javascript and libraries like jQuery, use of latest tools on HTML5 and CSS3

### Soy Henry Bootcamp

Full Stack Developer | October 2020 | +800hs

Intensive program about the most in-demand tools in the market. (React, Redux, NodeJs, Express, Sequelize, PostgreSQL, Git).

Teamwork projects using agile methodologies

### Universidad de Buenos Aires

Graphic Design | 2015 (Incomplet)

Design fundamentals, technique drawing, artistic drawing, transformation methodologies
