WORK EXPERIENCE

Software developer Team Leader | Ineco - Mental health
March 2021 - Present

II'm in charge of passing the clients needs and desires to our devs team.
I also design our high reliable and scalable micro-services architecture and flow of our products.
Working and solving our most challenging tasks while also organizing and leading the team.
- Mobile development with Flutter.
- Frontend with ReactJS, MaterialUI.
- Backend with Typescript, ExpressJS, MongoDB, MySQL, Docker, Kubernetes in a microservices architecture.

Co-founder | buildware
June 2021 - Present

Working os a side-project where we make IoT devices and help companies have more control and insights about their products and infrastructure.
I'm in charge of the product design and also work with the development team as a software engineer.

Freelance
2018 - Present

Fullstack development works working with CMS (Wordpress), HTML, CSS and JS in the Front-end. And with NodeJS, Express, Sequelize and MongoDB in the Back-end.
-Developing the UI/UX design.
-Coding front-end.
-Coding API server for back-end.
-Designing data contracts and flows.
